

Why Disclosure?

As an accredited provider of continuing medical education (CME) the Academy is required by the Accreditation Council for Continuing Medical Education (ACCME) to obtain and share with participants of any AAOS CME activity any potential conflicts of interest by faculty, program developers, and CME planners.

The ACCME Standards of Commercial Support, Standard 2 states the requirements:

- 2.1 The provider must be able to show that everyone who is in a position to control the content of an education activity has disclosed all relevant financial relationships with any commercial interest to the provider.
- 2.2 An individual who refuses to disclose relevant financial relationships will be disqualified from being a planning committee member, a teacher, or an author of CME, and cannot have control of, or responsibility for, the development, management, presentation or evaluation of the CME activity.

The AAOS disclosure policy requires that faculty submit all financial relationships occurring within the past 12 months.

Each participant in the Annual Meeting has been asked to disclose if he or she has received anything of value, in any amount, from a commercial company, which relates directly or indirectly to the subject of their presentation. The Academy has identified the options to disclose as follows:

- 3 – Royalties;
- 4 – Speakers Bureau/paid presentations
- 5a. – Paid consultant or employee;
- 5b. – Unpaid consultant
- 7 – Research or institutional support has been received;
- 8 – Stock or stock options; or
- 10 – Miscellaneous non-income support (e.g. equipment or services);
- n – No conflicts to disclose

These codes reflect the numbers used in a series of questions answered by all persons participating in the Academy's overall online Disclosure Program, which is available to all Academy members at www.aaos.org/disclosure.

The Academy does not view the existence of these disclosed interests or commitments as necessarily implying bias or decreasing the value of the author's participation in the meeting; however, these data are offered to the audience as additional information that may be helpful in evaluating the educational presentations.
